

# STRATEGIC EVENTS

Call for Applications from IRC Faculty Members

# Aims of the Call

---

Connect research groups addressing similar challenges in different departments

Establish new connections between research groups across the university

Support our membership in preparing to apply for large-scale funding grants

Identify areas of interest that would benefit from further support by the IRC

# How will it work?

---

Half or full day programme  
of talks, workshops and  
discussions

Up to 30 people

Organised by two or more  
IRC faculty members

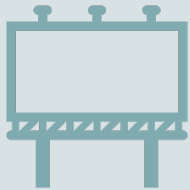

Events to take place in the  
next 6-8 months

# How will it work?

---

Applicants to manage the programme, lead the sessions and assist with advertising the event

EngBio IRC to support with funding, logistics and advertising the event

# What are we looking for?

---

Engineering biology tools and techniques

e.g. lab automation

Emerging areas of research with impact on, or overlap with, engineering biology

e.g. AI and machine learning

Application of engineering biology principles to specific problems or challenges

e.g. antimicrobial resistance

Preparation for upcoming collaborative funding applications with relevance to engineering biology

e.g. sLoLa grants

# How to Apply

---

Online Application

Open on a rolling  
basis

Applications  
reviewed monthly
